Importance: High

Hi Everyone,

Please remind staff in your respective areas to ensure that the new product code - Convoy Costs 2022 is being used to track all convoy/protest related costs incurred this past week and going forward. A significant amount of resources were used this weekend to clear the protesters. The City will be asking senior levels of government for reimbursement and we will need to be able to quantify these costs.

Thanks
Tony

Importance: High

Hi Everyone,

Can you please advise all Financial Planning staff that a new PS Class Code #14309 – Convoy Costs 2022 has been set up to track costs related to measures required to address the ongoing protests at the border crossings.

We may need to identify and quantify these costs in the future. Although the main departments that are expected to incur costs are : WPS, Fire, PW Operations & Transit, other areas may also become involved.

Please contact me if you have any questions

Thanks
Tony
